## Abstracts

Food preparation appliances is expected to post a volume CAGR of 2-5% over 2015-2020 for all regions. Growth opportunities are mainly driven by health awareness, new product development, increased female employment as well as the influence of cooking shows. Internet retailing will continue to be the fastest growth channel for food preparation appliances over the next five years, as consumers continue to enjoy the convenience of online shopping.

Euromonitor International's Food Preparation Appliances: Key Trends and Growth Opportunities Up to 2020 global briefing offers a comprehensive guide to the retail sales data, allowing you to identify the sectors driving growth. The report also identifies the leading companies/brands and offers strategic analysis of key factors influencing the competitive landscape - be it new product developments, technological innovations, economic/lifestyle influences, distribution or pricing issues. Additionally, trade statistics and producer's shares will answer questions on where appliances are produced and where they are being exported to, how quickly these units are moving, which companies are producing how much, and whether all categories are behaving in the same way. Collectively, this gives a complete view in both marketing and production planning strategies. Forecasts illustrate how the market is set to change.
