## Abstracts

The free from lactose and dairy markets continue to record strong growth in Israel in 2021, with the increasing availability of milk alternatives, including oat milk, sesame drinks and more, as well as cheese and yoghurt substitutes. Growth is also attributable to more consumers avoiding dairy for health reasons – including a rise in veganism in the country and allergies - as well as environmental reasons.

Euromonitor International's Free From in Israel report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2017-2021, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2026 illustrate how the market is set to change.

**Product coverage:** Free From Allergens, Free From Dairy, Free From Gluten, Free From Lactose, Free From Meat.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
