Abstracts

The growth trajectory of plant-based alternatives was already significant across packaged food before the COVID-19 pandemic in early 2020. Consumers have grown to be more aware about making better food choices for themselves and the environment since coming out of lockdown. Consequently, demand for plant-based and free from dairy alternatives is expected to continue rising at the expense of mainstream dairy choices. COVID-19 has indisputably impacted consumer preferences and habits, with interes...

Euromonitor International's Free From in New Zealand report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2016-2020, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2025 illustrate how the market is set to change.

Product coverage: Free From Allergens, Free From Dairy, Free From Gluten, Free From Lactose, Free From Meat.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?
