Abstracts

Free from lactose will continue to experience demand in 2021 as a large proportion of the South African population is lactose intolerant. Whilst the economic impact has left many consumers struggling financially, those suffering from intolerances continue to choose these products to help them maintain good health. In addition, free from lactose products tend to be sold at a similar price to regular milk and dairy products. Therefore, the choice to purchase free from lactose is less driven by pri...

Euromonitor International's Free From in South Africa report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2017-2021, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2026 illustrate how the market is set to change.

Product coverage: Free From Allergens, Free From Dairy, Free From Gluten, Free From Lactose, Free From Meat.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
