## Abstracts

2012 was a gloomy year for Vietnamese real estate in general. Consequently, dependent industries such as construction and furniture and homewares stores were also severely affected. 2012 was the first year during the review period that furniture and homewares stores witnessed current value decline. This was also due to the closure of many inefficient businesses.

Euromonitor International's Furniture and Homewares Stores in Vietnam report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.

### Why buy this report?

Get a detailed picture of the Furniture and Homewares Stores market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;
