## Abstracts

Despite the strong demand for houses and apartments, which was in line with the rapid development of the Indonesian property market, especially in major cities in Indonesia, value sales of furniture and furnishings stores failed to grow more strongly in 2011 than in 2010. This was because many Indonesians prefer to buy fully-furnished houses and apartments, which is considered more convenient, as they can save time searching for and buying furniture.

Euromonitor International's Furniture and Furnishings Stores in Indonesia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Product coverage:** Chained Forecourt Retailers, Independent Forecourt Retailers.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.

## Why buy this report?

Get a detailed picture of the Furniture and Furnishings Stores market;

Pinpoint growth sectors and identify factors driving change;
