Abstracts

There are signs that renewable energy, in particular solar and wind energy, is becoming increasingly disruptive. Falling costs as well as growing pressure from governments and consumers for a change to business as usual will deepen the transition to renewable energy. The green energy landscape is positive but not without its challenges. Momentum is building behind the business case for companies to switch to renewable energy.

Strategy Briefings offer unique insight into emerging trends world-wide. Aimed squarely at strategists and planners, they draw on Euromonitor International's vast information resources to give top line insight across markets and within consumer segments. Written by some of our most experienced analysts, they are designed as provocations for senior management to use in their own forum, allowing them to stand back and reflect on the behaviour and motivation driving global markets today and tomorrow

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
