Abstracts

The report provides a global overview of production, consumption and prices of soybeans. Soaring input costs and supply disruptions put pressure on soybean producers and add more volatility to the market. Meanwhile, dry weather in South America has resulted in tightened global supply in 2021/2022, adding to upward pressure on soybean prices. Over the long term, rising demand for animal protein from the world's growing population is set to support consumption of soybeans, an important feed input.

Strategy Briefings offer unique insight into emerging trends world-wide. Aimed squarely at strategists and planners, they draw on Euromonitor International's vast information resources to give top line insight across markets and within consumer segments. Written by some of our most experienced analysts, they are designed as provocations for senior management to use in their own forum, allowing them to stand back and reflect on the behaviour and motivation driving global markets today and tomorrow

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report

Identify factors driving change now and in the future

Understand motivation

Forward-looking outlook

Briefings and presentation should provoke lively discussion at senior level

Take a step back from micro trends

Get up to date estimates and comment

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
