Abstracts

The quantity and quality of human signal sensing within the smart connected home will be integral to its development and the quality of service provided. Today, the development of the smart user interface points to a future when even the incompetent can be trusted with household tasks, as they are monitored and guided to make the right choices. The arrival of domestic AIs is the logical progression which will tie together a host of domestic ecosystems, but will there be one AI to rule them all?

Euromonitor International's Gotta Have Soul: The Connected Home, AI and Smart Systems Get An Injection of “Humanity” - Part III global briefing offers an insight into to the size and shape of the Home Care market, highlights buzz topics, emerging regions, countries and categories as well as pressing industry issues and white spaces. It identifies the opportunity zones within home care, analyses leading companies and brands and offers strategic analysis of major factors influencing the market - be they new product developments, packaging/ format /ingredients innovations, economic/lifestyle/environmental influences, distribution or retail pricing issues. Forecasts illustrate how the market is set to change and criteria for success.
