Abstracts

Health and wellness packaged food recorded positive sales growth in 2021 as the negative volume growth recorded in 2020 was completely reversed and considerable additional volume and value was added to the category over the course of the year. The main factor supporting the market's strong performance during the year was the relaxation of widespread social distancing regulations, which gave consumers the opportunity to shop in retail stores freely once again. In particular, grocery stores were a...

Euromonitor International's Health and Wellness in Indonesia report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2017-2021, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2026 illustrate how the market is set to change.

Product coverage: Focus Categories by Key Functional Ingredients, Health and Wellness by Category, Health and Wellness by Type, Health Wellness by Prime Positioning.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Health and Wellness market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
