Abstracts

Production of hi-tech goods in Indonesia grew strongly in 2018. Indonesian electronics production largely followed an upward trend in domestic demand, where locally-made electronics are primarily sold. The market reflected positive economic trends, such as increasing private investments and a more favourable business environment due to recent government efforts to deregulate the economy. Not less important was the digitization trend in the country, with companies actively incorporating electroni...

Euromonitor International's Industrial reports provide a 360 degree view of an industry. The Industrial market report offers a comprehensive guide to the size and shape of the Hi-tech Goods market at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, packaging innovations, economic/lifestyle influences, distribution or pricing issues. Forecasts illustrate how the market is set to change.
