Abstracts

Retail current value sales in home improvement and gardening stores increased for the third year in a row in Germany in 2012, this time by 2%. The channel profited from the cocooning trend, which meant that consumers spent more time at home, and became more aware of their surroundings. Sales only saw a slight decline during the financial crisis of 2008/2009, and performed well thereafter, due to increased consumer confidence and higher purchasing power.

Euromonitor International's Home Improvement and Gardening Stores in Germany report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Home Improvement and Gardening Stores market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;
