Abstracts

Saudi Arabia faced a marked shortage of housing at the end of the review period, with an estimated shortfall of two million homes. This hindered sales for many product areas within home improvement and gardening stores. However, the channel benefited from many households seeking to house an increasing number of people, with the number of conversions and extensions being significant in Saudi Arabia's increasingly overcrowded cities at the end of the review period.

Euromonitor International's Home Improvement and Gardening Stores in Saudi Arabia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Home Improvement and Gardening Stores market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;
