Abstracts

During 2012, home improvement and gardening stores was among the few retailing channels in Spain which did not experience a decline in value sales due to the effects of the economic crisis. Home improvement and gardening centres increased in value by 1% in 2012. It is important to note that the Spanish construction industry has not recovered from the profound slump which it entered at the beginning of the economic crisis in 2008 and since then very few new homes have been built in Spain.

Euromonitor International's Home Improvement and Gardening Stores in Spain report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
