Abstracts

Global warming has been creating environmental changes and conditions that have naturally had a significant and largely positive impact on demand for home insecticides in Belgium - the warmer climate is attracting more mosquitos and exotic insects. In western Europe the warmer summers have accelerated the growth of flying insects in particular. Moreover, because home insecticides are considered necessary and essential whenever there is a high incidence of insects, consumers tend to buy these pro...

Euromonitor International's Home Insecticides in Belgium market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, packaging innovations, economic/lifestyle influences, distribution or pricing issues.
