Abstracts

The surge in dengue cases, attributed to the increase in construction activities in Singapore, is likely to have been one factor supporting demand for home insecticides in 2023, and possibly future sales. As construction projects create conducive environments for the breeding of mosquitoes, which are vectors for dengue fever, there is a heightened need for effective insect control measures within residential spaces. The expansion of construction activities often leads to the accumulation of stag...

Euromonitor International's Home Insecticides in Singapore market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth.
