Abstracts

Home insecticides experienced a decline in volume sales in 2023, as demand for such products weakened, partly due to the perception that they use harsh chemicals. Despite this, South Korea witnessed an increase in mosquito populations, as there was abundant rainfall and high humidity levels during the summer months, allowing mosquitoes to remain active until the autumn period. The growing demand for greener solutions supported current value growth.

Euromonitor International's Home Insecticides in South Korea market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, packaging innovations, economic/lifestyle influences, distribution or pricing issues. Forecasts to 2028 illustrate how the market is set to change.

Product coverage: Electric Insecticides, Insecticide Baits, Insecticide Coils, Other Home Insecticides, Spray/Aerosol Insecticides.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Home Insecticides market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and
