Abstracts

Televisions recorded slight volume growth in 2023, with OLED TVs seeing strong double-digit growth as consumers looked to upgrade their older televisions with screens offering high picture and sound quality, which are light and have more sophisticated designs than LCD TVs. High-quality OLED TVs are performing particularly strongly in terms of volume growth, although in terms of actual volume sales, LCD TVs are more popular as they are more affordable.

Euromonitor International's Home Video in Hungary report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth.
