Abstracts

In 2022, Australia experienced a series of floods caused by heavy rainfall in the eastern region that began in late February. The floods caused devastating damage in New South Wales and South East Queensland, and the damp weather conditions that followed in the heavily populated east coast of Australia created ideal breeding conditions for household insects such as flies, mosquitoes, ants, cockroaches, and others. As a result of the floods, the primary pest concern in 2022 was cockroaches, which...

Euromonitor International's Home Insecticides in Australia market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, packaging innovations, economic/lifestyle influences, distribution or pricing issues. Forecasts to 2027 illustrate how the market is set to change.
