## Abstracts

The year 2023 witnessed a mild winter and an early onset of warmer summer months in New Zealand, attributed to an El Niño weather system. El Niño typically brings increased westerly winds, more rain in the west, and dry conditions in the east. The warm start to the summer, coupled with extreme weather events, created favourable conditions for insect growth. The record warm September, in particular, contributed to an ideal environment for the proliferation of flies. Conversely, the shift from pre...

Euromonitor International's Home Insecticides in New Zealand market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, packaging innovations, economic/lifestyle influences, distribution or pricing issues.
