Abstracts

Composite containers are popular due to offering the right mix of constituent materials, often resulting in composites that are corrosion resistant. They can also resist damage from weather and harsh chemicals. These containers are also lighter in weight, compared to most woods and metals, making them highly suitable for most hot drink categories, such as flavoured powder drinks and instant coffee.

Euromonitor International's Hot Drinks Packaging in Germany report offers insight into key trends and developments driving packaging across the category. The report also examines trends and prospect for various pack types and closures: metal packaging, rigid plastic, glass, liquid cartons, paper-based containers; flexible packaging.

Data coverage: Coffee, Other Hot Drinks, Tea.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
