Abstracts

Strong growth was observed for cooking ingredients and meals throughout the first months of 2022, with healthier variants such as no added sugar and natural growing at a very fast pace as consumers resumed their normal activities. However, sales were negatively affected by accelerating inflation rates in Chile in the second half of the year, leading to a slowdown in growth, especially as health and wellness cooking ingredients and meals tend to be priced higher than standard variants. The fourth...

Euromonitor International's HW Cooking Ingredients and Meals in Chile report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector.
