Abstracts

Overall volume sales of low fat cooking ingredients and meals continued to increase in France in 2022. Buoyant demand reflected rising consumer awareness of the health risks associated with being overweight or obese, a well-established trend that became more pronounced during the second half of the review period due to concerns surrounding COVID-19. The further expansion of low fat assortments in several categories also helped to maintain strong interest in this area. One key factor behind the g...

Euromonitor International's HW Cooking Ingredients and Meals in France report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors.
