## Abstracts

Dairy farming and agriculture have long been a staple of the New Zealand economy, with ample access to high quality meat and dairy products forming the backbone of the traditional New Zealand diet. While health and wellness preferences have been the main driver of New Zealanders' dietary preferences diversifying towards more plant-based diets, the environmental impact of meat and dairy production is becoming an increasingly important consideration. The dairy and meat farming industry is New Zeal...

Euromonitor International's HW Cooking Ingredients and Meals in New Zealand report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
