Abstracts

Although products low in sugar are becoming more noticeable in cooking ingredients and meals, product innovation has so far been less proactive than in other packaged food categories, and consumers' attention has not yet been captured. However, South Korean consumers looked for low sugar products more in 2022, in line with the soaring popularity of no sugar products in soft and alcoholic drinks. While in terms of health and wellness, innovation lagged in packaged food before the COVID-19 outbrea...

Euromonitor International's HW Cooking Ingredients and Meals in South Korea report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
