Abstracts

New lifestyles, including flexible working models, have encouraged local consumers to cook more often at home. This is in addition to rising inflation in the UK, which has been pushing up the cost of meals through consumer foodservice. This trend supported demand for sauces, dressings and condiments in 2022, particularly no salt, no fat and no added sugar options, due to the greater focus on health and wellness since the pandemic. This trend has encouraged leading brands to review their offer, i...

Euromonitor International's HW Cooking Ingredients and Meals in United Kingdom report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
