Abstracts

Protein-enriched products have become increasingly popular in Germany due to the growing interest in healthy eating and fitness. These products provide a convenient and appetising way for people to consume greater protein content, which is considered important for building and repairing muscle tissue, maintaining healthy bones, and repairing the metabolism. This is in addition to other attributes of dairy as a source of calcium and essential nutrients.

Euromonitor International's HW Dairy Products and Alternatives in Germany report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.

Product coverage: HW Baby Food, HW Dairy and Plant-based Dairy, HW Dairy Products and Alternatives by Type.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
