Abstracts

Dairy farming and agriculture have long been central to the New Zealand economy, with high quality locally produced dairy products comprising a core component of the traditional New Zealand diet. While health and wellness claims in products such as fresh milk still hold appeal, consumers are increasingly balancing this against the environmental impact of dairy production, with the local dairy industry being New Zealand's largest contributor to its greenhouse gas emissions. While the local indust...

Euromonitor International's HW Dairy Products and Alternatives in New Zealand report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.

Product coverage: HW Baby Food, HW Dairy and Plant-based Dairy, HW Dairy Products and Alternatives by Type.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
