Abstracts

Public education campaigns and information obtained from social media are making people in Indonesia – particularly middle- and higher-income consumers – more aware of the many health risks associated with being overweight or obese. Despite this, retail volume sales of no sugar, low sugar and no added sugar coffee products declined sharply in the country in 2022. These results were partly attributable to more cautious attitudes to discretionary spending as high inflation drove up unit prices and...

Euromonitor International's HW Hot Drinks in Indonesia report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
