Abstracts

Organic claims are significant in both the tea and coffee categories in the hot drinks market in the Netherlands. However, in 2022, there was a sharp decline in retail value sales of the organic claim. While organic remains one of the smaller categories in health and wellness hot drinks, it has been relatively successful compared to other categories. During the pandemic, there was exceptional growth in retail sales of organic hot drinks, as consumers spent considerable time at home and sought to...

Euromonitor International's HW Hot Drinks in Netherlands report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
