Abstracts

Caffeinated products continued to record dynamic growth within hot drinks in 2022, as many local consumers looked to these beverages for an effective energy boost and to remain focused as a result of stress, anxiety and insomnia, all of which have been exacerbated by the pandemic; at the same time, as caffeine consumption grows, consumers are paying increasing attention to mitigating caffeine's negative side effects, substituting some drinking occasions throughout the day with no caffeine option...

Euromonitor International's HW Hot Drinks in United Kingdom report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
