Abstracts

The transition to low sugar and no sugar products began a few years ago, although the pandemic accelerated the trend. The pandemic brought significant changes in the way consumers approached their health and wellness which led to a sudden and unexpected surge in the retail sales of health and wellness soft drinks at that time. The primary cause of this increase was the fact that the on-trade, such as bars and restaurants were largely closed for most of 2020 and some of 2021, which caused consume...

Euromonitor International's HW Soft Drinks in Netherlands report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
