Abstracts

At the beginning of the review period, gluten free staple foods was an underdeveloped category. Specialised channels such as health food stores and organic supermarkets were the main distribution channels and consumers who struggled with issues surrounding gluten had to visit multiple stores to buy groceries. However, as consumers have increasingly become better educated about the importance of diet and are more aware that their health issues could be related to a gluten intolerance, gluten free...

Euromonitor International's HW Staple Foods in Netherlands report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
