Abstracts

Towards the end of the review period, Norway's health and wellness staple foods industry continued to record rising sales as a result of the development of the overall health and wellness trend. The largest category across the industry is natural processed meat, seafood and alternatives to meat, and this is largely due to rising demand for plant-based alternatives to meat. Towards the end of the review period, a significant shift was seen towards plant-based options in meat, seafood and meat sub...

Euromonitor International's HW Staple Foods in Norway report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
