In-car navigation experienced severe competition from smartphones, which is why major players focused primarily on premium quality, to distinguish their offer from other products. To use a smartphone while driving is prohibited by law in Italy; nevertheless this is a common use. Communication campaigns from in-car navigators are focused on safety, but apparently this was not enough to invert the trend.

Euromonitor International's In-Car Entertainment in Italy report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, distribution or pricing issues. Forecasts illustrate how the market is set to change.
