Abstracts

Finding new alternative sources of protein is a focus to sustainably ensure access to nutritious food for a global population of nine billion in 2040. Dried insects often contain over 50% protein and are part of the diet for almost two billion people worldwide. Meanwhile, in the West, insect meal is emerging as a protein addition in bread, breakfast cereals, snack bars, ice cream, biscuits and milk alternatives. Do insects have the potential to become an important source of protein?

Euromonitor International's Insects for Dinner: Examining True Potential global briefing offers an insight into to the size and shape of the Packaged Food market, highlights buzz topics, emerging geographies, categories and trends and identifies the leading companies and brands. It also offers strategic analysis on driving packaged food industry trends like health and wellness, premiumisation, convenience and value-for-money and how those trends influence factors like new product developments, packaging innovations, retail distribution and retail pricing both historically and into the future.

Product coverage: Cooking Ingredients and Meals, Dairy Products and Alternatives, Snacks, Staple Foods.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Packaged Food market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;
