Abstracts

Internet retailing in Pakistan has grown largely because of increasing internet connectivity and accessibility in the country. The number of registered e-commerce merchants in the country increased strongly over the review period, primarily because of the introduction of 3G/4G telecom services and the availability of cheaper smartphones. Moreover, factors such as cash on delivery, frequent discount deals, a wide variety of products and ease of product delivery also acted as catalysts for growth.

Euromonitor International's Internet Retailing in Pakistan report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.
