Current value growth in internet retailing in 2016 was significantly slower than the 15% value CAGR experienced during the review period, but still easily the most dynamic of all major retailing channels in Austria. Growth was driven by mobile internet retailing, increasing demand from older consumers and increasingly successful cross-channel strategies of many of Austria's leading store-based retail chains.

Euromonitor International's Internet Retailing in Austria report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.
