Abstracts

Rapid urbanisation and population increase in Iran is creating challenges for the development of Iranian cities, which could face shortages of affordable housing, elevated pollution and water scarcity. Although the capital, Tehran, remains the main economic powerhouse of Iran, Qom and Karaj are expected to witness dynamic economic development, becoming important industrial and tech hubs. Meanwhile, Ahvaz is set to see slower economic growth and increasing temperatures.

Euromonitor International's City Review reports analyse key trends and developments in 126 world's major cities. They provide localised city information in terms of economy, consumer lifestyles, housing and transport and city environment and offer valuable insights for strategic planning.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
