Abstracts

Natural increase will drive brisk population expansion in Iraq in 2021-2040. Falling fertility and birth rates will drive an acceleration in ageing, however the median age will remain youthful in a global context. Faster growth in the working age population compared to general growth could bring about a demographic advantage, but only if sufficient jobs and training are created. Swift urbanisation will lead to more than three-quarters of the population living in an urban area by 2040.

Euromonitor's Iraq in 2040: The Future Demographic report analyses factors influencing national consumer expenditure. Consumer lifestyles reports include coverage of: population, urban development, home ownership, household profiles, labour, income, consumer and family expenditure, health, education, eating habits, drinking habits, shopping habits, personal grooming, clothing, leisure habits, savings and investments, media, communication, transport and travel and tourism. Use this report to understand the factors influencing a nation's lifestyle choices.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Consumer Lifestyles market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
