Abstracts

In 2022, price increases posed significant challenges for juice producers. The surge in inflation rates, reaching a 30-year high in Chile, impacted various categories, including juice. Within the category, supply chain disruptions and the depreciation of the Chilean peso further compounded the issue, resulting in price hikes approximately three percentage points above the inflation rate. Notably, these increases were relatively consistent across juice.

Euromonitor International's Juice in Chile report offers a comprehensive guide to the size and shape of the market at a national level.
