## Abstracts

In August 2023, the World Apple and Pear Association (WAPA) published its production forecast estimating that the apple harvest in Europe in 2023 will be 3% lower than the previous year. Meanwhile, Poland, which is considered Europe's largest apple producer, is expected to witness a steep drop in production following the record harvest in 2022, with produce levels down by 11%. The low harvest was unable to meet demand from juice manufacturers, resulting in higher prices for apple and pear juice.

Euromonitor International's Juice in Poland report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (2018-2022), allowing you to identify the sectors driving growth.
