## Abstracts

Lodging was continuing its gradual recovery in Western Europe in 2022. While value growth was dynamic in this year, as in 2021, sales are still some way short of their pre-pandemic levels, given the size of the losses seen in 2020 due to the various COVID-19 restrictions introduced across the globe. The key to a full recovery is likely to lie in the wholesale return of business travellers as well as big-spending tourists from important source markets like China or the US.

Euromonitor International's Lodging in Western Europe global briefing offers an insight into to the size and shape of the Travel market, highlights buzz topics, emerging geographies, categories and trends as well as pressing industry issues. It identifies the leading companies and brands, offers strategic analysis of key factors influencing the market from innovation, pricing, channel distribution to economic/lifestyle influences. Forecasts illustrate how the market is set to change and outlines the criteria for success.

**Product coverage:** Booking, Car Rental (Destination), In-Destination Spending, Lodging (Destination), Tourism Flows, Travel Modes.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.
