Abstracts

Despite solid gains in oil-related sectors, Saudi Arabia's construction and infrastructure recorded negative growth over 2018 as the government cut back on infrastructure spending. In fact, only 37.5% of the allocated infrastructure budget of SAR54.1 billion was spent during the first nine months of 2018. Notable decline in infrastructure developments was partially offset by accelerating investments in energy and downstream projects, stimulating demand for metal products over the year.
