Abstracts

Only department stores and variety stores were present in mixed retailers in 2016. Due to a lack of tradition, no warehouse clubs or mass merchandisers operate in the Czech Republic. Because of the fact that all the leading companies have a stronger presence in other channels, mixed retailers is only a subsidiary channel for them. Therefore, mixed retailers has a weak position in the Czech retailing landscape.

Euromonitor International's Mixed Retailers in Czech Republic report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.
