Abstracts

As mobile device saturation continues, the interest in mobile internet retailing increased, in line with further credit dispersion among local millennial consumers who use internet shopping platforms regularly. In 2018, mobile phones were most commonly used to browse inventory while online purchases primarily were through desktops or laptops. Because of this, most online retailers continued to invest in the further development of their traditional website platforms, while complementing their cor...

Euromonitor International's Mobile Internet Retailing in Costa Rica report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
