Abstracts

Mobile internet retailing remains an emerging retailing channel and a minor part of overall internet retailing in Georgia. The increasing coverage of 4G internet makes the process of purchasing quicker and more convenient. Low-cost internet and larger data packages are encouraging Georgians to use their smartphones to browse for and purchase products from domestic or foreign websites.

Euromonitor International's Mobile Internet Retailing in Georgia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Mobile Internet Retailing market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;
