Abstracts

In 2018, mobile internet retailing continued to outperform overall internet retailing in Latvia, partly due to being at a nascent stage and thus growing from a very low base. Nevertheless, Latvians are more actively using their mobile phones to shop. Indeed, mobile phones are the most popular devices for accessing the internet when not at home or work. However, mobile ranks behind portable computers and desktops in terms of popularity when placing an online order. The number of smartphone owners...

Euromonitor International's Mobile Internet Retailing in Latvia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

Get a detailed picture of the Mobile Internet Retailing market;

Pinpoint growth sectors and identify factors driving change;
