Pages: 36

Price: US\$ 990.00 (Single User License)

ID: MB0C23F7CA4EN

## Abstracts

Thanks to high penetration of mobile devices and tech-savvy consumers, mobile internet retailing is already accounting for the majority of total internet retailing sales. South Korean consumers are more comfortable with using mobile devices over PC when they are purchasing some products, as they are heavily using their mobile devices to search and browse. Thus, mobile-based marketing through mobile applications will be more active.

Euromonitor International's Mobile Internet Retailing in South Korea report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

**Data coverage:** market sizes (historic and forecasts), company shares, brand shares and distribution data.

### Why buy this report?

Get a detailed picture of the Mobile Internet Retailing market;

Pinpoint growth sectors and identify factors driving change;

Understand the competitive environment, the market's major players and leading brands;

Use five-year forecasts to assess how the market is predicted to develop.
