Abstracts

Mobile retailing sales remain slight in Uruguay, with only a few applications for mobile retailers available in the country. The majority of the apps were initially designed for grocery sales; however, that has changed, and many of those apps are starting to include other products in their offer. Many companies are starting to enter internet retailing, with yet no available mobile apps. Nevertheless, during the review period there was a massive increase in smartphone users in the country, and co...

Euromonitor International's Mobile Internet Retailing in Uruguay report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
